

## Longcester® LC-964

Catalyst for Epoxy, Hybrid and TGIC Powder Coatings

### General Description

LC-964 is a catalyst masterbatched at 10% active level in polyester resin. Improve mechanical performance of powder coatings.

- Improves the compatibility
- Accelerate powder coatings reaction
- Recommended levels:0.3~1.5% (total formulation)

### Product Specifications

Property	Range	Test Method
Appearance	White granules	Visual
Melting Range ( °C )	85~90	ISO11357-1
Active Ingredient, %	10%	Longcai method
Volatile	<1.5%	Longcai method
